

# *unitedstreaming* in Action: Windows Movie Maker

**Windows Movie Maker** is software that enables you to use and edit *unitedstreaming* video segments\* and create your own movies. Produce movies with a few simple drag-and-drops. Share your movies in class or on the school website.

Download a free copy of Windows Movie Maker 2.1 by going to  
<http://www.microsoft.com/windowsxp/downloads/updates/moviemaker2.msp>

Windows Movie Maker runs on Windows XP Home Edition and Windows XP Professional.

## In the Classroom

Showcase your students' communication and presentation skills by showing student-produced movies during parent Open House night. Students will utilize topic-specific *unitedstreaming* video segments and images in their movie and demonstrate their ability to select, organize and compose a story that effectively communicates an idea.

## Create a Movie

- Step 1 Have students select a topic.
- Step 2 Have students map out the basic story and narration.
- Step 3 Download topic-specific, images and editable *unitedstreaming* video segments for students to use in their movies.
- Step 4 Have students add video segments and images to the Movie Maker storyboard.
- Step 5 Have students record narration.
- Step 6 Show the movies during parent Open House night.

*Drag-and-drop clips onto the storyboard to build your movie.*

\*Look for the editable icon  next to *unitedstreaming* video segments that you can download and import into Movie Maker.

For additional Movie Maker ideas, go to the Professional Development > Project Demonstrations section of [www.unitedstreaming.com](http://www.unitedstreaming.com)
